# NURSING ASSISTANT

## Career Outlook

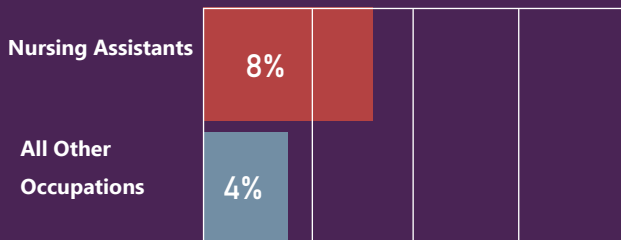

Certified Nursing Assistants/Licensed Nursing Assistant are truly special people who genuinely care for others and take great pride in their work, making a valuable contribution to a patient's comfort and safety when they are at their most vulnerable. With their direct interaction to patients, CNAs are considered an essential link between the patient and the nurse. Employment of nursing assistants is projected to grow 8 percent from 2019 to 2029, much faster than the average for all occupations\*

As the baby-boom population ages, nursing assistants will be needed to help care for an increasing number of older patients in nursing and residential care facilities. Older people are more likely than younger people to have disorders such as dementia, or to live with chronic diseases such as heart disease and diabetes. More nursing assistants will be needed to care for patients with these conditions.
